Notes to the Abbreviated Accounts

Year ended 30th June 2013

1. Accounting policies

Basis of accounting

The accounts have been prepared under the historical cost convention, modified to include the revaluation of certain fixed assets, and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008)

The accounts are prepared on the going concern basis, which the directors consider appropriate having reviewed the cashflow position and budgets for the coming twelve months

Turnover

Turnover represents the value, net of value added tax and discounts, of goods provided to customers and work carried out in respect of services to customers

Goodwill

Positive purchased goodwill arising on acquisitions is capitalised as an asset on the Balance Sheet and amortised over its estimated useful life

Fixed assets

Tangible fixed assets are stated at historical cost except for the leasehold property which has been included in the balance sheet at a valuation obtained during September 2009. The company has adopted this policy of revaluation under FRS15 and will update the valuation of land and buildings at least every 5 years. FRS15 requires a valuation to be prepared in the fifth year after a revaluation.

Depreciation

Depreciation is calculated so as to write off the cost or revaluation of an asset, less its estimated residual value, over the useful economic life of that asset as follows

Leasehold Property	-	2% straight line on revalued amount
Plant & Machinery	-	15% - 25% on reducing balance

The revaluation reserve represents the surplus on revaluation of tangible fixed assets and is being credited back to profit and loss account at the same rate as the underlying assets are depreciated

Stocks

Stocks and finished goods are valued at the lower of cost and net realisable value, after making due allowance for obsolete and slow moving items

Hire purchase agreements

Assets held under hire purchase agreements are capitalised and disclosed under tangible fixed assets at their fair value. The capital element of the future payments is treated as a liability and the interest is charged to the profit and loss account on a straight line basis

1. Accounting policies *(continued)*

Pension costs

The company operates a defined contribution pension scheme. Contributions are charged to the profit and loss account as they become payable in accordance with the rules of the scheme.

Deferred taxation

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events have occurred at that date that will result in an obligation to pay more, or a right to pay less or to receive more tax, with the following exceptions:

Deferred tax assets are recognised only to the extent that the directors consider it is more likely than not that there will be suitable taxable profits from which the future reversal of the underlying timing differences can be deducted.

Deferred tax is measured on an undiscounted basis at the tax rates that are expected to apply in the periods in which timing differences reverse, based on tax rates and laws enacted or substantively enacted at the balance sheet date.

Financial instruments

Financial instruments are classified and accounted for, according to the substance of the contractual arrangement, as financial assets, financial liabilities or equity instruments. An equity instrument is any contract that evidences a residual interest in the assets of the company after deducting all of its liabilities.
