NOTES TO THE ABBREVIATED ACCOUNTS
FOR THE YEAR ENDED 30 APRIL 2015

1 Accounting policies

Basis of preparation

The full financial statements, from which these abbreviated accounts have been extracted, have been prepared under the historical cost convention and in accordance with the Financial Reporting Standard for Smaller Entities (Effective April 2008)

Going concern

The financial statements have been prepared on a going concern basis

Turnover

Turnover represents amounts chargeable, net of value added tax, in respect of the sale of goods and services to customers

Tangible fixed assets and depreciation

Depreciation is provided on tangible fixed assets so as to write off the cost or valuation, less any estimated residual value, over their expected useful economic life as follows

Asset class	Depreciation method and rate
Plant and machinery	20% of cost
Fixtures and fittings	20% of cost

Investment properties

Certain of the company's properties are held for long-term investment. Investment properties are accounted for in accordance with the FRSSE, as follows

No depreciation is provided in respect of investment properties and they are revalued annually. The surplus or deficit on revaluation is transferred to the revaluation reserve unless a deficit below original cost, or its reversal, on an individual investment property is expected to be permanent, in which case it is recognised in the profit and loss account for the year.

This treatment as regards the company's investment properties may be a departure from the requirements of the Companies Act concerning the depreciation of fixed assets. However, these properties are not held for consumption but for investment and the directors consider that systematic annual depreciation would be inappropriate. The accounting policy adopted is therefore necessary for the financial statements to give a true and fair view. Depreciation or amortisation is only one of many factors reflected in the annual valuation and the amount which might otherwise have been shown cannot be separately identified or quantified.

Deferred tax

Deferred tax is recognised, without discounting, in respect of all timing differences between the treatment of certain items for taxation and accounting purposes, which have arisen but not reversed by the balance sheet date, except as required by the FRSSE.

Deferred tax is measured at the rates that are expected to apply in the periods when the timing differences are expected to reverse, based on the tax rates and law enacted at the balance sheet date.

Financial instruments

Financial instruments are classified and accounted for, according to the substance of the contractual arrangement, as financial assets, financial liabilities or equity instruments. An equity instrument is any contract that evidences a residual interest in the assets of the company after deducting all of its liabilities. Where shares are issued, any component that creates a financial liability of the company is presented as a liability in the balance sheet. The corresponding dividends relating to the liability component are charged as interest expense in the profit and loss account.
